Training Consulting

It is often quoted that training very rarely results in lasting behavioral changes and is therefore merely a feel good factor. Since the nature & outcomes training are very intangible, it is indeed difficult to quantify the ROI on training. This has been a topic for debate since the earliest days of training especially in a corporate setup.

Our approach of a training consulting intervention is an attempt at bringing in visible and tangible results in this area. It involves a step by step approach to impact sustained behavioral changes in

individuals. The intervention aims at bringing in enhanced effectiveness and clarity to employees in terms of their job role and responsibilities through a structured process.

Consulting Areas

- Competency Framework Design
- Competency Assessments
- Design Competency Development Interventions
- Talent Management
- Training Need Identification / Analysis
- Customized Learning & Development Plan
- Deliver Training Interventions

All the above interventions start with pre-defined

Specific, Measurable Results (SMRs), that are reviewed post the interventions.
